

Baker Tech celebrates launch of new boat with the Paddlers in the Pink

02 July 2011 – As part of continuing efforts to support those in need, Baker Tech donated a new boat to the Breast Cancer Foundation's dragon boat support group – the Paddlers in the Pink (PIP). On Saturday, 02 July 2011, Baker Tech and the PIP celebrated the launch of their new boat and took it out for its maiden voyage.

The PIP are a support group under the Breast Cancer Foundation made up of breast cancer victims and survivors with a passion for rowing. The new boat, which replaces one of the old boats that had fallen into disrepair, is lighter and safer.

Baker Tech is proud to sponsor the brave survivors of the PIP in their worthy pursuit. We hope that our continued support will go a long way in motivating the PIP and those involved in their cause.
